PROFILE SUMMARY

Motivated Computer Science graduate with a strong foundation in programming and software development principles. Currently gaining hands-on expertise in agentic AI by building intelligent agents with the LangGraph framework, emphasizing automation and requirement handling. Skilled in Python and agentic frameworks. Collaborative team player with a growth mindset, committed to scalable software solutions.

EDUCATION

- Madanapalle Institute of Technology & Science** Madanapalle, Andhra Pradesh
B.Tech in Computer Science & Engineering(4 yrs); **CGPA:** 9.6*/10 2021— 2025

SKILLS

Languages: Python, Java, SQL

Web Technologies: HTML,CSS, JavaScript, SpringBoot

Concepts: OOPS, Agile Methodologies

Tools: VSCode, Git, Numpy, Pandas

PROJECTS

Software Development Life Cycle Agent | Python, LangGraph, Prompt Engineering, MongoDB

- Developed an LLM-powered Test Case Agent using LangGraph to analyze user stories and automatically generate comprehensive test cases, accelerating SDLC validation.
- Designed and implemented an automated pipeline that extracts requirements from MongoDB, leverages LLMs for content creation, renders Mermaid.js diagrams, and exports HTML/DOCX with metadata for design documentation.
- Built a Test Strategy Agent that synthesizes functional, business, and user requirements into structured documents, enabling earlier alignment in the SDLC process.
- Engineered an environment-aware Test Strategy Agent leveraging LLMs to generate detailed, automated strategy documents from business requirements and user stories, streamlining QA planning.

ATM Monitoring System | *HTML, CSS, JavaScript, Spring Boot, Azure*

- Engineered an ATM monitoring system leveraging Spring Boot and Azure IoT Hub to enhance real-time monitoring, security, and device uptime.
- Streamlined cloud data handling and remote control through REST APIs and an interactive UI, improving operational efficiency and system performance.

HR Analytics DashBoard | *Python, Excel, Numpy, Pandas, PowerBI*

- Designed and developed an interactive HR analytics dashboard in Power BI, visualizing key metrics such as attrition, salary trends, and workforce demographics.
- Delivered data-driven insights on employee attrition by age, gender, and salary bands, enabling HR teams to improve retention strategies and workforce planning.

INTERNSHIPS

Programmer Analyst Trainee – Cognizant Technology Solutions

- Collaborated on software development tasks, focusing on clean code practices, debugging, and full-stack development training.

Data Analyst Intern – CodeTech IT Solutions

- Worked on data collection, cleaning, and analysis to generate actionable insights, applying data preprocessing, feature engineering, and visualization techniques for real-world problem-solving.

ACHIEVEMENTS

- Organized a college-level coding event, “**Crack the Code,**” which achieved great success in terms of participation, and received a medal in recognition of this accomplishment.
- Solved 500+ problems** across **Leetcode, HackerRank, CodeChef.** [Profiles: [CodeChef](#) | [Leetcode](#)]
